

# Who We Are

Let's learn  
together!  
Where do you  
call home?

Look at the globes already on the map to see where the ManageBac family lives all around the world. Then, use the stickers provided to show us the roots of your learning community.

Share how you are using the map and stickers in your classroom with us on social media.

Simply tag us  [@managebac](https://twitter.com/managebac)

share your location, and use hashtag **#MBforPYP** to see how other classrooms are using it, too.

# Sharing the Planet

How do you share the planet? Take a look at the beautiful and diverse environments displayed on the map, and show us where you can find these animals around the world and in your community. We have also included human stickers for students to decorate with markers and express themselves sharing the planet with nature.

## Challenge Idea

Match up the populations of different countries with the human stickers to map out where human population density is highest and lowest on Earth.

Share how you are using the map and stickers in your classroom with us on social media.
